Project Planning Phase

Milestone and Activity List

Date	09-11-2022
Team ID	PNT2022TMID13258
Project Name	Smart Fashion Recommender Application
Maximum Marks	8 marks

MILESTONES	ACTIVITY	DESCRIPTION
Ideation Phase	Literature Survey	Literature survey on
		selected project and
		gathering information
	Empathy Map	Prepare empathy map to
		capture the user pains
		and gains, prepare a list
		of problem statement.
	Ideation	Organising the
		brainstorming session
		and prioritise the top
		three ideas based on
		feasibility hand
		importance.
Project Design Phase 1	Proposed Solution	Prepare proposed
		solution document
		which includes novelty,
		feasibility of ideas,
		business model, social
		impact, scalability of
		solution.
	Problem Solution fit	Prepare problem
		solution fit documents.
	Solution Architecture	Prepare solution
		architecture document
		of the project.

Project Design Phase 2	Customer journey map	Prepare customer
1 Toject Besign Thase 2	Customer journey map	journey map to
		understand the user
		interactions and
		experience with the
		application.
	Functional requirements	Prepare functional and
		non-functional necessity
		document.
	Data Flow Diagram	Prepare data flow
		diagram and user
		stories.
	Technology	Draw technology
	Architecture	architecture diagram.
Project Planning Phase	Milestones and Activity	Prepare milestones and
	list	activity list of the
		project.
	Sprint delivery plan	Planning of sprints.
Setting-up app	Create IBM cloud	Sign up IBM cloud
environment	Account	account
	Create flask project	Getting started with the
	Project	flask to create project.
	Install IBM cloud CLI	Install IBM command
	mstan ibivi cicua cibi	line interface (CLI).
	Docker CLI installation	Installing docker CLI.
	Create an account in	Create an account in
	SendGrid	SendGrid and use
	Schdorid	service as email
		integration to the
		application for sending
Davis of D. 1	D.1' CC ' .	emails.
Project Development Phase	Delivery of Sprint- 1,2,3,4	
Implementing Web	Create UI to interact	To develop and submit
Application	with the application	the code after
		completion of testing.
	Create IBM DB2 and	Create an IBM DB2 in
	connect with the Python	the IBM cloud and
		connect it to python.
	L	

Integrating SendGrid	SendGrid integration	The SendGrid services
service	with the python	must be integrated in
		order for the application
		to send emails.
Developing a chatbot	Building a chatbot and	Build the chatbot and
	integrate with the	integrate it to the flask
	application.	application.
Deployment of the app	Containerize the app	Create a docker image
in IBM cloud		of the application in
		addition to push it to the
		IBM container registry.
	Upload image to IBM	Upload the image to
	container registry.	IBM container registry.
	Deploy it in Kubernetes	Once the image is
	Cluster	uploaded to IBM
		container registry
		deploy the image toward
		IBM Kubernetes cluster.
